

Job Profile

Position Name: QA Engineer

Experience: 2 – 5 years

Educational Qualifications: B.E. / B. Tech. / M.E. / M. Tech. / M.S. in Computer Science or related field from a premier institute.

Location: Okhla Phase - 1, New Delhi, India

Principal Responsibilities:

- Review requirements specifications and technical design documents to provide timely and meaningful feedback
- Should not just be an outstanding tester, but will bring a mind-set of creativity, innovation and balance bleeding edge technology development with a relentless pursuit of timely product engineering delivery.
- Ability to manage projects independently.
- Create detailed, comprehensive and well-structured test plans/cases/scripts to test various modules of the applications and execute automation test scripts for functionality, load, performance, etc. using open source tools.
- Identify record, document thoroughly, track bugs and perform regression testing when bugs are resolved.
- Understand consumer behaviour by studying analytics & competitors and define product vision and strategy keeping in mind business impact.
- Should keep track of the competitive landscape as well as monitor the new developments to continuously drive the product forward.
- Owning and working end-to-end testing on an application – from system (server, deployment, configuration management) to back end (container, application, database) to front end (AJAX, Tiles, CSS, HTML, JavaScript).
- Log, review, follow up issues in the bug tracking system.

Opportunities:

- Working with Top MNC Company like IRCTC, NPCI, VISA India, Banks, Telecom Operators, Airlines, etc.
- Responsible for potentially hire and train small internal team to support and sustain innovation.
- Reporting directly to the CTO and also to CMO & senior managements.

Core Competencies:

- Hands-on experience with both white box & black box testing and solid knowledge of SQL.
- Expertise in Creating Test Plans, Test Cases, Writing defects, Defect Management, etc.
- Stay up-to-date with new testing tools and test strategies.
- Convert manual test cases into automated test case.
- Experience working with QA/development methodologies (Waterfall and Agile), Testing Life cycle.
- Experience in the Financial Industry, Digital Payments or Travel Space would be a good to have, but not mandatory. If experience with a start-up would be added advantage.
- Experience of handling products on a large scale but not mandatory.
- Multitasking abilities are a must as you will be handling more than one project at a time.
- At least 2 years of strong hands-on testing experience of Mobile Apps (Native Apps, HTML5), Web Applications and Web Services/API (SOAP, REST, JSON, XML).
